

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

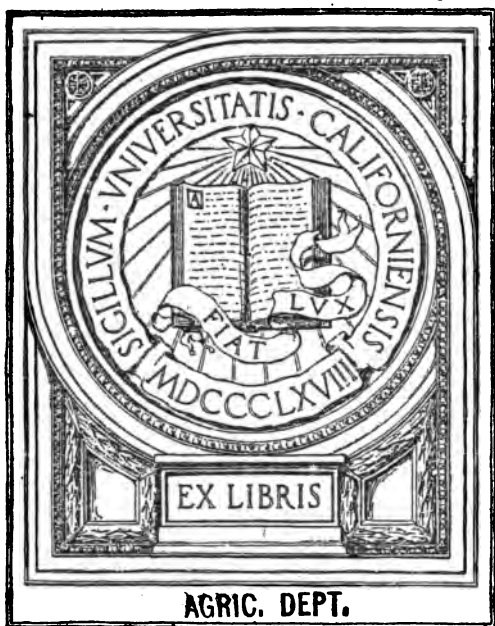

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
OFFICE OF EXPERIMENT STATIONS,  
*Washington, D. C., August 1, 1903.*

SIR: I have the honor to transmit herewith and to recommend for publication as a circular of this Office a list of names, with addresses, of State directors of farmers' institutes and farmers' institute lecturers of the United States, prepared by John Hamilton, farmers' institute specialist of this Office. This list has been prepared from data received in response to a circular sent to directors of farmers' institutes in the several States and Territories asking for the names of those who have been engaged in farmers' institute work under their direction. It does not include local lecturers employed by local authority.

Respectfully,

A. C. TRUE,  
*Director.*

Hon. JAMES WILSON,  
*Secretary of Agriculture.*

## LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
OFFICE OF EXPERIMENT STATIONS,  
*Washington, D. C., June 1, 1904.*

SIR: I have the honor to transmit herewith and to recommend for publication as a circular of this Office a list of names, with addresses, of State directors of farmers' institutes and farmers' institute lecturers of the United States, prepared by John Hamilton, farmers' institute specialist of this Office. This list has been prepared from data received in response to a circular sent to directors of farmers' institutes in the several States and Territories asking for the names of those who have been engaged in farmers' institute work under their direction. It does not include local lecturers employed by local authority.

Respectfully,

A. C. TRUE,  
*Director.*

Hon. JAMES WILSON,  
*Secretary of Agriculture.*

## INTRODUCTORY NOTE.

---

The list of farmers' institute directors and of institute lecturers first published by this Office in 1903 has been revised and brought up to date in the present publication.

The lecture list consists of names sent in by the State directors and embraces only such as have been in their employ during the preceding lecture season.

The Division of Publications sends regularly to those whose names are on the lecture force copies of the monthly list of publications of the Department, from which they can select and send to the institute specialist for such copies as they desire. Many of the agricultural experiment stations of the country also make use of the lecture list in mailing their bulletins, and a bimonthly list of all publications of the experiment stations is issued by the Department and sent to the same list.

It is important as changes occur in the post-office addresses of lecturers that the institute specialist be promptly informed so that publications sent out by the Department and by the experiment stations may be properly directed.

The purpose in publishing the names of the directors and lecturers is that the institute workers of the country may be known, and a way be opened up for communication respecting institute engagements. It is also for the purpose of enabling the experiment stations and the Department of Agriculture to aid the lecturers by sending them the results of agricultural research work as they are obtained.

## LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
OFFICE OF EXPERIMENT STATIONS,  
*Washington, D. C., September 1, 1905.*

SIR: I have the honor to transmit herewith and to recommend for publication as a circular of this Office a list of names, with addresses, of State directors of farmers' institutes and farmers' institute lecturers of the United States, prepared by John Hamilton, farmers' institute specialist of this Office. This list has been prepared from data received in response to a circular sent to directors of farmers' institutes in the several States and Territories asking for the names of those who have been engaged in farmers' institute work under their direction. It does not include local lecturers employed by local authority.

Respectfully,

HON. JAMES WILSON,  
*Secretary of Agriculture.*

A. C. TRUE,  
*Director.*

## INTRODUCTORY NOTE.

---

The list of farmers' institute directors and of institute lecturers first published by this Office in 1903 has been revised and brought up to date in the present publication.

The lecture list consists of names sent in by the State directors and embraces only such as have been in their employ during the preceding lecture season.

The Division of Publications sends regularly to those whose names are on the lecture force copies of the monthly list of publications of the Department, from which they can select and send to the institute specialist for such copies as they desire. Many of the agricultural experiment stations of the country also make use of the lecture list in mailing their bulletins, and a bimonthly list of all publications of the experiment stations is issued by the Department and sent to the same list.

It is important as changes occur in the post-office addresses of lecturers that the institute specialist be promptly informed, so that publications sent out by the Department and by the experiment stations may be properly directed.

The purpose in publishing the names of the directors and lecturers is that the institute workers of the country may be known, and a way be opened up for communication respecting institute engagements. It is also for the purpose of enabling the experiment stations and the Department of Agriculture to aid the lecturers by sending them the results of agricultural research work as they are obtained.

JOHN HAMILTON.

*Washington, D. C., September 1, 1906.*

SIR: I have the honor to transmit herewith, and to recommend for publication as a circular of this Office, a list of names, with addresses, of State directors of farmers' institutes and farmers' institute lecturers of the United States, prepared by John Hamilton, Farmers' Institute Specialist of this Office. This list has been prepared from data received in response to a circular sent to directors of farmers' institutes in the several States and Territories asking for the names of those who have been engaged in farmers' institute work under their direction. It does not include local lecturers employed by local authority.

Respectfully,

A. C. TRUE,  
*Director.*

Hon. JAMES WILSON,  
*Secretary of Agriculture.*

## INTRODUCTORY NOTE.

---

The list of farmers' institute directors and of institute lecturers, first published by this Office in 1903, has been revised and brought up to date in the present publication.

The lecture list consists of names sent in by the State directors, and embraces only such as have been in their employ during the preceding lecture season.

The Division of Publications sends regularly to those whose names are on the lecture force copies of the monthly list of publications of the Department, from which they can select and send to the Institute Specialist for such copies as they desire. Many of the agricultural experiment stations of the country also make use of the lecture list in mailing their bulletins, and a bimonthly list of all publications of the experiment stations is issued by the Department and sent to the same list.

It is important as changes occur in the post-office addresses of lecturers that the Institute Specialist be promptly informed, so that publications sent out by the Department and by the experiment stations may be properly directed.

The purpose in publishing the names of the directors and lecturers is that the institute workers of the country may be known and a way be opened up for communication respecting institute engagements. It is also for the purpose of enabling the experiment stations and the Department of Agriculture to aid the lecturers by sending them the results of agricultural research work as they are obtained.

JOHN HAMILTON.

## LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
OFFICE OF EXPERIMENT STATIONS,  
*Washington, D. C., November 1, 1907.*

SIR: I have the honor to transmit herewith, and to recommend for publication as a circular of this Office, a list of names, with addresses, of State directors of farmers' institutes and farmers' institute lecturers of the United States, prepared by John Hamilton, Farmers' Institute Specialist of this Office. This list has been prepared from data received in response to a circular sent to directors of farmers' institutes in the several States and Territories asking for the names of those who have been engaged in farmers' institute work under their direction. It does not include local lecturers employed by local authority.

Respectfully,

A. C. TRUE,  
*Director.*

HON. JAMES WILSON,  
*Secretary of Agriculture.*

## INTRODUCTORY NOTE.

---

The list of farmers' institute directors and of institute lecturers, first published by this Office in 1903, has been revised and brought up to date in the present publication.

The lecture list consists of names sent in by the State directors, and embraces only such as have been in their employ during the preceding lecture season.

The Division of Publications sends regularly to those whose names are on the lecture force copies of the monthly list of publications of the Department, from which they can select and send to the Institute Specialist for such copies as they desire. Many of the agricultural experiment stations of the country also make use of the lecture list in mailing their bulletins, and a bimonthly list of all publications of the experiment stations is issued by the Department and sent to the same list.

It is important as changes occur in the post-office addresses of lecturers that the Institute Specialist be promptly informed, so that publications sent out by the Department and by the experiment stations may be properly directed.

The purpose in publishing the names of the directors and lecturers is that the institute workers of the country may be known and a way be opened up for communication respecting institute engagements. It is also for the purpose of enabling the experiment stations and the Department of Agriculture to aid the lecturers by sending them the results of agricultural research work as they are obtained.

JOHN HAMILTON.

## LETTER OF TRANSMITTAL.

---

U. S. DEPARTMENT OF AGRICULTURE,  
OFFICE OF EXPERIMENT STATIONS,  
*Washington, D. C., November 1, 1908.*

SIR: I have the honor to transmit herewith, and to recommend for publication as a circular of this Office, a list of names, with addresses, of State directors of farmers' institutes and farmers' institute lecturers of the United States, prepared by John Hamilton, Farmers' Institute Specialist of this Office. This list has been prepared from data received in response to a circular sent to directors of farmers' institutes in the several States and Territories asking for the names of those who have been engaged in farmers' institute work under their direction. It does not include local lecturers employed by local authority.

Respectfully,

A. C. TRUE,  
*Director.*

Hon. JAMES WILSON,  
*Secretary of Agriculture.*

---

## INTRODUCTORY NOTE.

---

The list of farmers' institute directors and of institute lecturers, first published by this Office in 1903, has been revised and brought up to date in the present publication.

The lecture list consists of names sent in by the State directors, and embraces only such as have been in their employ during the preceding lecture season.

The Division of Publications sends regularly to those whose names are on the lecture force copies of the monthly list of publications of the Department, from which they can select and send to the Institute Specialist for such copies as they desire. Many of the agricultural experiment stations of the country also make use of the lecture list in mailing their bulletins, and a bimonthly list of all publications of the experiment stations is issued by the Department and sent to the same list.

It is important as changes occur in the post-office addresses of lecturers that the Institute Specialist be promptly informed, so that publications sent out by the Department and by the experiment stations may be properly directed.

The purpose in publishing the names of the directors and lecturers is that the institute workers of the country may be known and a way be opened up for communication respecting institute engagements. It is also for the purpose of enabling the experiment stations and the Department of Agriculture to aid the lecturers by sending them the results of agricultural research work as they are obtained.

A large number of personal-history blanks, giving the age, qualifications, experience, and list of topics discussed, have been filled out by institute lecturers and deposited in the office of the Institute Specialist. This information is accessible to State directors for use in selecting speakers for their institutes.

JOHN HAMILTON.

**U. S. DEPARTMENT OF AGRICULTURE.****OFFICE OF EXPERIMENT STATIONS—CIRCULAR 51 (Revised).****A. C. TRUE, Director.****LIST OF STATE DIRECTORS OF FARMERS' INSTITUTES AND FARMERS' INSTITUTE LECTURERS OF THE UNITED STATES.**

The list of farmers' institute directors and of institute lecturers, first published by this Office in 1903, has been revised and brought up to date in the present publication.

The lecture list consists of names sent in by the state directors, and embraces only such as have been in their employ during the preceding lecture season.

The Division of Publications sends regularly to those whose names are on the lecture force copies of the monthly list of publications of the Department, from which they can select and send to the Institute Specialist for such copies as they desire. Many of the agricultural experiment stations of the country also make use of the lecture list in mailing their bulletins, and a monthly list of all publications of the experiment stations is issued by the Department and sent to a part of the same list.

It is important as changes occur in the post-office addresses of lecturers that the Institute Specialist be promptly informed, so that publications sent out by the Department and by the experiment stations may be properly directed.

The purpose in publishing the names of the directors and lecturers is that the institute workers of the country may be known and a way be opened up for communication respecting institute engagements. It is also for the purpose of enabling the experiment stations and the Department of Agriculture to aid the lecturers by sending them the results of agricultural research work as they are obtained.

A large number of personal-history blanks, giving the age, qualifications, experience, and list of topics discussed, have been filled out by institute lecturers and deposited in the office of the Institute Specialist. This information is accessible to state directors for use in selecting speakers for their institutes.
